# Xafinity wins TPA award at UK Pensions Awards 2011

Xafinity scooped the “**Third-Party Administrator of the Year**” award at last night’s Professional Pensions UK Pension Awards 2011 held at the Grosvenor Hotel in central London.

The competition in the category was tough; Xafinity came out on top from a shortlist of nine competitors in the industry including Aon Hewitt, Barnett Waddingham, Capita Hartshead, Hymans Robertson, JLT Benefit Solutions, Mercer, MNPA and rpm.

**Xafinity Paymaster Managing Director, Paul Bingham, commented:**

*“Xafinity has been extremely successful this year, not just with the number and quality of new business wins but also with the innovations we have delivered to clients, particularly in the TPA market.*”

*“Winning this award is particularly important for our people and I am delighted for the team. Schemes continue to change shape and our staff have had to respond with a fresh approach to service provision and technology. Key to our success is that our staff have worked in collaboration with our clients to implement innovations which meet a range of exacting requirements and this has enabled us to build on our core pension and payroll administration services so these are now delivered to over 2.9 million members across 750 schemes and 130 clients.”*

*“Our commitment to best practice TPA and our ambition to be the leading player in public and private sector pensions administration has been reinforced with this prestigious industry award and will continue going forward.”*
