

Providing innovative actuarial services to the UK Life industry

Helping manage change with flexible resourcing

The demand for actuarial expertise in the Life industry has never been greater. Regulatory requirements continue to grow, whilst new resource to market is in short supply. The result is that many organisations are struggling to cope with cyclical needs, peaks in work and special projects.

Hazell Carr provides skilled actuarial professionals to help meet these challenges, working in partnership with clients across the UK.

Hazell Carr resourcing solutions

Hazell Carr is the leading supplier of interim actuarial resource operating within the UK Life industry. We have worked with the majority of UK Life Offices as well as specialist insurers, reinsurers, and consultancies.

Why choose us

- Breadth of expertise: from junior students just starting the exams, to ex-appointed actuaries and other senior actuaries, our personnel represent a diverse array of skills and experience.
- Training and development: staff skills are kept current through an ongoing programme of actuarial, business and systems training.
- Flexibility: we match the requirements of our clients by deploying any size of team, on and off-site, for short and long term projects.

Modelling and Documentation

Modelling skills are always in short supply, particularly in proprietary systems such as MoSes, Prophet and VIP. However, Internal Models under Solvency II require a much wider perspective of a model's governance structure and documentation standards. Hazell Carr has experience in both developing and documenting actuarial models.

Data Quality and Data Migration

A focus on data quality and validation is being driven by regulatory initiatives and market change. These include the new requirements for Data and Statistical Quality under Solvency II, or business needs such as rationalising systems and taking on new blocks of business. Hazell Carr has been involved in major migration projects to help clients ensure that their data is accurate, appropriate and complete.

Backfilling

Releasing staff for special projects always causes resource constraints. Contract or interim resource can be the most efficient way to keep business-as-usual running smoothly. Hazell Carr places personnel in many roles, including Financial Reporting, Capital Management, With-profits and experience analysis.

Hazzell Carr is one of the UK's leading providers of skilled resources operating in the Financial Services industry today.

For more than a decade, Hazzell Carr has provided companies with a range of placement services, focussing on pensions administration, actuarial, complaint handling, customer services, project management and systems expertise.

With experience across many different sectors and projects, our clients benefit from a highly experienced, skilled and versatile resource pool (staff and associates), helping them manage workloads, develop best practice and transform their levels of customer service.
